To Katherine B. Forrest.

I have recieved 2 disc from my attorney labeled SD Card Mirror image. When I put it in the computer the first disc has files that is not compatible with the computer. It is in a format of .E01, .E02 File, etc. I cannot view the information on the disc. The second disc had nothing on it. I exhausted my remedies, I already sent my lawyer a letter on how he can fix the problem all he did was send another copy with the same problem.

The government sent a copy that was compatible with the computer before, ~~but~~ <sup>but</sup> had files missing. Now, all of a sudden nothing works. The files are most likely compressed. I am asking for the files

to be decompressed and put in the format of .jpeg, .Mp4, .Mp3, .avi, .mpg, .mpeg, and any other format that's compatible to <sup>programs</sup> ~~etc~~ like picture viewer, windows media player, Evidence reviewer, Divx player, adobe reader, VLC media player, & NV player also quick view plus. If the first copy I received in the year 2013 with the missing files were compatible why all of a sudden they put it in a format that isn't compatible to any of those programs. I need those copies for my future motions. I am entitled to those copies in proper format because some of these files were used at my trial. There is further evidence on the memory card that will exonerate me if I get proper copies in proper format.

Orkuel

Would the Government please  
resolve this issue with defense  
counsel asap? F.B.I. 2-13-15

Thank You

2/18/15
